

# Buy/Sell Excess Inventory

Our Diverse Sales Channels Get Maximum Value for Your Excess Inventory.

## START TODAY

### Identify Inventory

Identify the idle equipment you want to sell. Determine the desired approach for the inventory and PowerON can help execute. Not sure of the best approach, we'll provide recommendations.

### Contact PowerON

PowerON will review your product list with you and provide a detailed quote document. The quoted values are generated using a combination of market research, historical sales data, and forecasting demand.

### Take Action

Partner with PowerON to retain the most value for your equipment. Decide between sharing the revenue/risk associated with liquidation, selling outright, or opt to redeploy equipment to another part of your operation.

## PowerON will help minimize potential loss and responsibly manage end-of-life.

Get the most value from your aging/idle assets. We know buying preferences change as new devices are introduced to consumers. It's important to identify a partner that is agile enough to quickly respond to your changing product portfolio.

PowerON specializes in excess inventory, end of life, returned, service parts, and "as is" consumer electronics and personal computing inventory. We will help you recover value for your most time sensitive inventory challenges.

### Advantages

- Competitive values
